

GASER

S-1100 SEMI-AUTOMATIC HAMBURGER MACHINE

MACHINERY FOR THE
FOOD INDUSTRY

Semi-automatic hamburger machine for round and oval productions.

ORIGINAL

- Can be connected to any filler (outside diameter of output 30 mm).
- Lays cellophane on both sides automatically and cuts it to the same shape as the hamburger.
- Produces 108 mm round hamburgers or 122 mm x 90 mm oval hamburgers, as ordered.
- Produces from 20 to 40 hamburgers per minute (depending on filler speed and skill in operating).
- Hamburger weight from 60 to 130 grammes (thickness can be adjusted using a screw).
- Uses rolls of cellophane.
- Does not require electrical power.
- Easy to clean.
- Measurements 600 mm x 200 mm x 450 mm.
- Weight 18 Kg.
- Made of stainless steel.

RELATED MACHINES:

Fillers, batter-breading machines, Mixers and grinders.
